

COMPANY PROFILE

PT. GAPURAMAS PERKAKAS SAKTIMANDIRI
Direct Factory and Industry Sources

The cables company

"We are dedicated to serving each of our clients based on their unique needs and providing them with tailored solutions to address their supply-related challenges"

INTODUCTION

ABOUT OUR COMPANY

ABOUT US GPS-GAPURAMAS PERKAKAS SAKTIMANDIRI was established and focused on a supply chain of Electrical conductor Solutions with *end-to-end* services by provided premium quality electrical power cables & conductors, cables for control & instrument systems, including its accessories such as ladders - trays, and steel conduits.

We are a young and dynamic company that was born to develop a new concept of supply-chain of power cables, Fire Resistant Cables (FRC), control and instrument cables, and it accessories to support our esteemed customers in any industrial sectors, such as building construction and infrastructures, industrial electrical power maintenance, including after sales services.

Gapuramas also has been developed as a Direct Factory and Industry Sources for cables & conductor business to support our project customers in solving and performing their projects to improve their progress to finalize the electrical works by our ready stock cables.

INTRODUCTION

ABOUT OUR COMPANY

OUR VALUE Our core value is to enhance the business environment by prioritizing ethical practices and fostering collaboration in the supply of electrical conductor and cable solutions.

OUR VISION Our aim is to be your reliable partner in providing electrical conductor and power cables solutions, enabling you to achieve optimal results through innovative and dependable approaches, while also providing top-notch product support to ensure quality.

OUR MISSION The goal is to become a reliable partner for supply chain of Power & Control cables solutions by providing expert and fast services in various areas of supplying Cables & Conductor, Fire Resistant Cables and its services to enhance productivity in different industrial sectors.

OUR PRODUCTS

CABLES & CONDUCTOR

We source cables and conductors from three leading Indonesian companies: KMI-Kabel Metal Indonesia, Kabelindo, and SIK-Sumi Indo Kabel. These firms are renowned for their high-quality products and strong market reputation.

Our cable brands are sourced from reputable manufacturers known for producing high-quality electrical power cables and conductors. These companies prioritize the use of well-processed copper materials to ensure exceptional electrical conductivity. We offer a diverse range of low-voltage (LV) and medium-voltage (MV) power cables to meet various needs.

Our principals prioritize the production of cables utilizing pure copper and high-quality PVC or XLPE materials, ensuring optimal performance and insulation to prevent short circuits.

We offer various brands, including KMI-Kabel Metal Indonesia, Kabelindo, and SIK, which provide Standard Low Voltage (LV) and Medium Voltage (MV) cables. These include types such as NYY, NYM, NYA, NYAF, NYYHY, NYFGbY, N2XSEBY, N2XSEY, NA2XSy, and N2XY (XLPE), among others.

Applications for these cables span across building construction, infrastructure, industry, oil and gas, residential projects, and more.

WHAT WE DO?

PROJECT SUPPORT

GPS-Gapuramas engages in collaborative ventures with construction companies to provide a reliable supply of cables and conductors to support their projects.

SOLUTION PARTNER

Our objective is to provide superior quality copper and aluminum cable solutions to both of commercial and residential customers, while catering to their customized needs.

BUILDING CABLES & WIRES

NYA-NYM CABLES - SNI

The building wires for permanent installation in conduits or exposing wiring in dry locations, and inter-wiring in switchboards and control panels. Inherently flame retardant in compliance with IEC 60332-1. For common use of home or residential and office electricity power installation.

Availability size from 1.5MM-4.0MM in 2 cores - 3 cores, and 4 cores.

We supply Kabel Metal Indonesia (KMI) and Kabelindo Murni, both esteemed manufacturers of cables and conductors with a long-standing reputation for quality. Their products are essential for supporting electrical building wiring and infrastructure across the country. These factories are dedicated to delivering superior quality cables and conductors to their consumers.

KMI and Kabelindo cables are produced using advanced technology and undergo stringent quality assurance processes. Each type of cable is guaranteed for quality and supported by the manufacturer's warranty. Both brands are well-established in the market and are typically endorsed by M&E consultants for use in their electrical designs.

LOW & MEDIUM VOLTAGE CABLES

NYN-NYR/FGBY-N2XY-N2XSY-N2XSEBY

KMI-Kabel Metal and Kabelindo offer a comprehensive range of LV-Low Voltage and Medium Voltage cables that adhere to SNI and IEC standards. These low-voltage cables, featuring PVC or XLPE insulation, are suitable for both indoor and outdoor applications.

To ensure optimal cable performance, the following guidelines should be observed:

1. Armoured cables are not advisable for tray applications due to their weight, which can impose excessive loads on the tray.
2. Unarmoured cables should not be used for direct burial, unless they have been specifically designed and tested to meet direct burial requirements.
3. A PVC jacket is highly durable and resistant to a wide array of chemicals.
4. Available sizes from 1.5MM - 500MM (1 core - 2 cores - 3 cores, and 4 cores).
5. MV (Medium Voltage) Cables also available in various type from a single core to multi cores .

FLEXIBLE CABLES-CONTROL CABLES

NYAF-NYMHY-NYYHY-LIYCY-AWG & UTP

Flexible cables are used for Power cords or internal wiring with medium mechanical stress for electrical equipment, machinery, luminaires, and other portable appliances in dry indoor premises and outdoor application.

Permanent exposed wiring in humid environment, installation in tray or under plaster for industrial three phase 380 - 415 VAC or single phase 220 - 240 VAC multipurpose application, inherently flame retardant in compliance with IEC 60332-1.

AWG Wire Standards and UTP Cables:

We offer a range of specialized cables and wires for control and instrumentation that comply with AWG standards, as well as CAT-UTP cables for data transmission. Our inventory includes Belden and Delta cables, both of which are renowned for their exceptional quality in AWG and UTP cables.

These products are vital for supporting the infrastructure of electrical control wiring, audio and data transfer. Our suppliers are committed to delivering superior quality control cables and conductors to meet the needs of their customers.

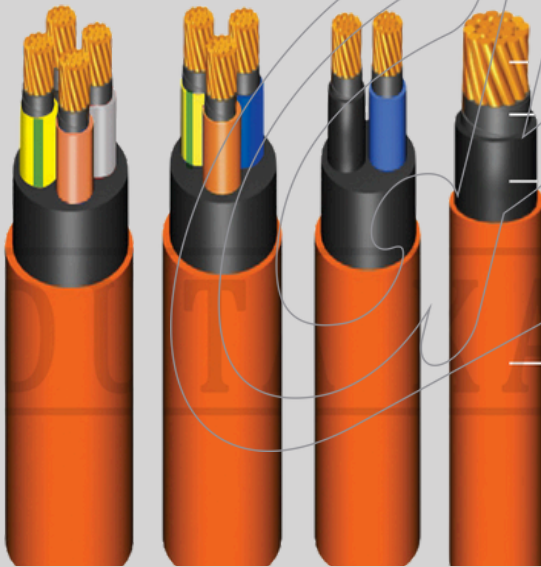

FIRE RESISTANT CABLES

N2XY XLPE & FRC CABLE

We procure cables and conductors from three prominent Indonesian companies - KMI-Kabel Metal Indonesia, Kabelindo, and SIK-Sumi Indo Kabel. These companies are recognized for their premium quality cables and established reputation in the market.

FIREPROOF or RESISTANT CABLE SIK-Sumi-Indo Kabel is a PMA cable company from Sumitomo established in 1982. SIK prioritizes the quality of self-processed copper material to produce excellent quality of electrical conduction. Has various variants and types of LV and MV power cables, especially FRC or fireproof types and data cables. Each type of cable is produced precisely with the supervision of Japanese experts with quality assurance in accordance with JIS, ISO UL and SNI.

XLPE CABLES

Polyethylene Insulation (XLPE)

SIK-Sumi Indo Kabel prioritizes the production of cables with green-material polyethylene (XLPE) for coating or insulation such as N2XY, N2XFGbY, N2XBY, etc which is very environmentally friendly and does not cause toxic fumes when a short circuit occurs.

The other brands we provides, KMI-Kabel Metal Indonesia and Kableindo for Standard Low Voltage (LV) and Medium Voltage (MV) cables such as NYY, NYM, NYA, NYAF, NYYHY, NYFGbY, N2XSEBY, N2XSEY, NA2XSY, etc.

Application: Data Centre building construction, infrastructures, industry, oil & gas, and etc compliances to Green Building Standard.

PROJECT MILESTONES

OUR WORK

ABOUT THE PROJECT

Our focus lies in supplying cables and wires, as well as installing mechanical and electrical systems for construction and building projects. We aim to assist our clients in achieving their goals by providing solutions for the supply of electrical power cables and conductors, as well as other related systems and installations. Our services include supply and support, material specification, pricing estimation of the power and control cable works, and accessories.

We have a track record of successful supply and support to projects, including:

- HLI Green Power - Karawang (Battery Industry) - PT. Shinsung ENC Indonesia (KMI & Kabelindo)
- Mc. Dermot Shipyard - Batam, PT. Shinsung ENC Indonesia
- UNILEVER Plant Indonesia, Cikarang by PT. Master Engineering Setvice (KMI).
- PT. Pindodeli -Papermills. (KMI)
- PT. Glico Wings - Karawang (Delta)
- Diamond Supermarket at Revo Shopping Mall, Bekasi (KMI & Kabelindo)
- Diamond Supermarket - POINS Mall - Lebakbulus. (Kabelindo)

- RS Pondok Indah - Jakarta by PT. Buana Mitra Global (Kabelindo)
- Mall Menara Jakarta by PT. Indojoya Sukses Makmur - (KMI & Belden)
- Hotel Gran Melia- Bali by PT. Banyu Mas Lima Perkasa (Supreme dan KMI/Kabel METal).
- AYANA Pulau Kura-Kura, Bali by PT. Banyu Mas Lima Perkasa. (Kabelindo)
- Summarecon Emerald - Karawang by PT. Rachindo Adi Persada .
- RSIA Hermina PIK 2 - Jakarta by PT. Pratama Naura Gemilang.
- NOVOTEL Ubud Resort - Bali by PT. Pratama Naura Gemilang.
- Muria Sumba Manis (Sugar Factory), Sumbawa by PT. Elco Power System. (Kabelindo)
- LIPPO Cikarang (KMI & Kabelindo)
- Other Industries, and several government projects.

THANK YOU FOR YOUR ATTENTION

Welcome any projects inquiries for Cables & conductors.
